OBJECTIVE

Computer Science undergraduate with a strong foundation in DSA, Web3, full-stack development, and AI/ML, seeking an internship at Celebal Technologies to contribute to impactful tech solutions and gain industry experience.

EDUCATION

Bachelor of Computer Science, Dr. B.C. Roy Engineering College

CGPA : 8.1 / 10 (Upto 5th sem)

2022 - 2026

SKILLS

Languages and Dev Tools	C, C++, JavaScript, Solidity, Java, Motoko
Web Development	HTML, CSS, Tailwind CSS, JavaScript, Node.js, Express.js, EJS, React.js, Vite
Web3 and Blockchain	Solidity, Hardhat, Chainlink, Starknet (Cairo), NFTs, ZKPs, Smart Contracts, Soulbound Tokens
Database and Backend	MongoDB, PostgreSQL, Firebase, REST APIs
AI/ML	Python, Machine Learning, AI-driven validation techniques
Tools and Platforms	Git, GitHub, Figma, Postman, VS Code, Docker

EXPERIENCE

AIML Intern

Aug 2024 - Sep 2024

Teachnook

Remote

- Conducted extensive data preprocessing including image augmentation, normalization, and noise reduction to improve model performance and robustness.
- Detailed study on YOLO and HAAR Cascades for face recognition used in smart attendance system.

PROJECTS

CredVault. Built a privacy-first system for verifying academic and professional credentials using Zero-Knowledge Proofs, AI-driven validation, and dynamic NFTs. Implemented smart contracts, document tampering detection, and real-time scoring to ensure secure and trustworthy credential management. ([Github](#))

Equinex. Built a Web3 launchpad on Starknet for secure, milestone-based funding of startups and intellectual property assets. Implemented smart contracts, on-chain KYC, verifier roles, and dynamic NFTs to ensure trust, transparency, and fund accountability. Designed a sleek frontend for project creation, investment tracking, and real-time milestone management. ([Github](#))

Kawach. Designed a healthcare web app featuring SOS alerts, real-time ambulance requests, and AI-guided first aid. Integrated a decentralized Document Sentinel for secure patient data exchange and doctor dashboards with appointment management. ([Github](#))

WheelsNDeals. Built a user-friendly platform for buying and selling cars and bikes. Implemented product listings, user dashboards, and secure transaction flow using full-stack technologies like Node.js, Express, and MongoDB. ([Github](#))

ACHIEVEMENTS

- Qualified GATE 2025 (Computer Science and IT)
- Achieved Rank 2 in Innoventure Expo in Institute for developing a real time health diagnostic web app.
- TechGig Code Gladiators '24 Finalist
